

Gutenberg Research Elements Short Guide for Fulltext Depositing

As a researcher at JGU, you have the option to upload the publisher PDFs or accepted manuscript versions of your journal articles recorded in Gutenberg Research Elements directly to JGU's open access repository, [Gutenberg Open Science](#). This allows you to comfortably use your second publishing rights for publisher publications and offer a direct link to the full texts on your public profile page.

The following steps are recommended:

Step 1: Go to the object detail page of the required publication

Step 2: Deposit the publication

Step 3: Check deposit status

Further information

Step 1: Go to the object detail page of the required publication

1

Select in the drop-down menu „My Work“ → „Publications“ and click in the „Claimed“ tab on the required publication.

2

Go to the box „**Repository**“ and click on „**OPENSOURCE.UB**“. By clicking on the „Deposit“-button you can start the deposit of your publication.

Note: The Deposit is only for the publication type „Journal article“ available.

Repository

METADATA.UB

OPENSOURCE.UB

This publication does not exist in the OPENSOURCE.UB repository.

DEPOSIT

Step 2: Deposit the publication

After clicking on "Deposit", you will be asked to provide more details about your file.

1

First check in the left box "deposit advice" in the tab „[Sherpa Romeo advice](#)“ under „Published“, whether there is permission to upload the publisher's PDF to the repository.

2

„**Prepare Deposit**“: Here you can select the PDF file of your publication and choose "published version" under "File version". You confirm this with "Use this file". If there is no permission to use the PDF file, you can select "accepted version" instead to upload the accepted manuscript version.

3

„**Add additional information**“: In this step you can enter the license ("Reuse license") and a message to the library in which you can provide additional information or ask questions about this licence ("Comment").

Note: If the publication isn't published with a CC-license, please select „InCopyright“.

4

„**Complete deposit**“: By clicking «**Deposit**» you can send the publication to the repository.

Step 3: Check deposit status

1

After you have submitted the publication, you can return to the object detail page of the publication in the following window by clicking on "View your publication". Under "Repository" → "OPENSOURCE.UB" you can view the status of the deposit. Before the library has checked your deposit, the status is set to "not live".

2

As soon as the journal article has been checked by the library team and released in the repository, the status is set to "live". This may take a few days.

Repository

METADATA.UB OPENSOURCE.UB (1)

FIRST DEPOSIT: 25 NOV 2022

good_tolerance_of_hyaluronic_-2022112... Last refreshed: 06 Mar 2023 08:25:47 LIVE VIEW

3

After the next update of your publication list on your public profile page at Research Elements, a link to the PDF file will appear with the publication.
