Gutenberg Research Elements
Quick guide for the full text upload

As a researcher at JGU, you have the option of uploading the publisher PDFs or the accepted manuscript versions of your journal articles recorded in Gutenberg Research Elements directly to JGU's open access repository, Gutenberg Open Science. In this way, you can conveniently use your secondary publication rights for publisher publications and provide a direct link to the full texts on your public profile page.

The following steps are recommended:

Step 1: Call up the object details page of the desired publication

Step 2: Deposit the publication

Step 3: Check deposit status

Further information

Step 1: Call up the object details page of the desired publication

1 In the "My Work" drop-down menu, select → "Publications" and click on the desired publication in the "Claimed" tab.

2 Go to the "**Repository**" box and click on "**OPENSCIENCE.UB**". You can now start the deposit of your publication with the "Deposit" button.

Note: The deposit is only available for the publication type "Journal article".

Step 2: Deposit the publication

As soon as you have clicked on "Deposit", you can enter more details about your file.

1 First check in the left box "**deposit advice**" in the tab "Sherpa Romeo advice" under "Published" whether you have permission to upload the publisher's PDF to the repository.

2 **Prepare Deposit**": Here you can select the PDF file of your publication and select "published version" → under "File version" . Confirm this with "Use this file". If you do not have permission to use the PDF file, you can select "File version" → "accepted version" instead to upload the accepted manuscript version

3 "**Add additional information**": In this step, you can enter the license ("Reuse license") and a message to the library in which you can provide additional information or ask questions about the license ("Comment").

Note: If the publication has not been published under a CC license, please select "InCopyright".

4 "**Complete deposit**": By clicking on "**Deposit**", you can send the publication to the repository.

Step 3: Check deposit status

1 After you have sent the publication, you can return to the object details page of the publication in the following window by clicking on "View your publication". Under "Repository" → "OPENSCIENCE.UB" you can view the status of the deposit.

Before the library has checked your deposit, the status is set to "not live".

2 As soon as the journal article has been checked by the library team and activated in the repository, the status is set to "live". This may take a few days.

Repository

METADATA.UB   **OPENSCIENCE.UB (1)**
